

# Skee-Ball, leveled up.

We run a skee-ball league every Monday. Now your phone keeps the score, tracks the standings, and remembers **exactly who's been hot** — straight from your browser, nothing to install.

Scoring a lane, just like in the app

## Scan in at your lane

Point your camera at the code on the lane and you're checked in. No sign-up sheet, no waiting around.

## Tap in every ball

Log each roll as you play. One person can keep score for the whole group, solo or as a team.

## Watch the standings

See how your team's doing each Monday, and where you land for the season.

## Know your numbers

Averages, best rings, personal records — the story behind your game, ball by ball.

## Earn a title

Live in the 40s and you're a **Smooth Roller**. Own the 50 and you're **Monarch of 50's**. Wear it on your profile.

## Brag a little

Had a big game? Send a link to your scorecard so everyone can see the rank.

### YOUR PROFILE

#### More than a username

Your avatar, your pronouns, the **title you've earned**, your trophies, and your whole league stat line — all in one place.

### ★ COMING EARLY 2027

#### Fantasy Skee-Ball

Draft a squad under a salary cap, ride hot streaks, work the transfer market. **Your stats already count** — every night you play now builds your value for draft day.

## Scan it, make an account, get on the board.

- **Free to join** — takes about a minute
- **Any phone works** — it opens right in your browser
- **Add it to your home screen** and it runs like an app
